PROFESSIONAL SUMMARY

Results-driven Full-Stack Developer with 3+ years of experience architecting scalable SaaS platforms. Specialized in the **Next.js/React** ecosystem backed by robust **DevOps** pipelines (Terraform, Azure, Docker). Proven track record of improving system performance. Immediately available for roles requiring rapid delivery of cloud-native applications.

TECHNICAL SKILLS

Frontend	Backend	Cloud & DevOps
Next.js, React, TypeScript, ShadCN, KonvaJS, Zustand, Tailwind CSS	NestJS, Node.js, Expressjs, Prisma ORM, REST APIs, PostgreSQL, Bun	Azure, GitHub Actions (CI/CD), AWS, Nginx, Docker, Terraform (IaC)

PROFESSIONAL EXPERIENCE

Digital African Design Studio (D-TALK Startup) Remote
Full-Stack Developer Nov 2024 – Present

- **Engineering & Performance:** Built a creator platform using **Next.js** and a real-time **KonvaJS** configurator; optimized state management (Zustand) to achieve **98+ Lighthouse scores** and reduced redundant API calls by **40%**.
- **DevOps Implementation:** Stabilized production on **Azure** using **Terraform**; implemented secure CI/CD pipelines via GitHub Actions with multistage Docker builds.
- **Scaling:** Migrated data layer to **PostgreSQL** with connection pooling (PgBouncer) to handle increased traffic loads.

Tactix Solutions Remote
Full-Stack Developer (Contract) Jun 2025 – Jul 2025

- **Rapid Delivery:** Delivered a production-ready e-commerce platform (React/NestJS) in under 8 weeks, reducing time-to-market by **30%** via modular architecture.
- **Optimization:** Achieved **sub-1.2s page loads** and WCAG 2.1 AA compliance using ShadCN and Tailwind, driving an **18% increase** in sales conversions.

NGB Professional Aug 2024 – Oct 2024
Full-Stack Development Trainer

- Mentored cohorts in the full SDLC (Node.js/React), enforcing **Clean Architecture** and Git Flow best practices.
- Guided students from ideation to **Dockerized deployment**, resulting in industry-standard portfolio projects.

Freelance & Self-Employed Jun 2022 – Present
Full-Stack Developer

- **Project: Menu-gr.tn:** Developed and deployed a digital menu platform for the Tunisian restaurant sector, streamlining order management.
- Delivered MVP-to-production solutions for diverse clients using the **T3 Stack (Next.js, TypeScript, Tailwind)** and **Prisma/PostgreSQL**.
