

Benarfa Hamza

Full-Stack Developer

+216 22 633 345 contact@benarfa.com https://benarfa.com/ https://linkedin.com/in/hamzabenarfa/

Summary

Full-Stack Developer with 3 years of experience building scalable web applications in startup environments. Expertise in **Next.js, TypeScript, and React** for high-performance UIs, **NestJS** backend services, and **DevOps** (CI/CD, AWS, environment management). Proven mentor in clean architecture and developer experience, driving practical skill growth through code reviews and hands-on workshops.

Experience

Digital African Design Studio (D-TALK Startup) Nov 2024 – Present

Full-Stack Developer

https://www.d-talk.co/

- Engineered** a creator-focused digital ecosystem frontend with Next.js (App Router), transforming Figma designs into responsive, accessible interfaces that achieved **98+ Lighthouse scores** for performance and UX.
- Built interactive 2D product configurators with KonvaJS that enable real-time band customization—such as placing designs on T-shirts—**boosting average session duration by 40% and increasing conversions by 25%**.
- Optimized state management** via Zustand (global state) and React Query (server-state synchronization), **reducing API calls by 40%** and ensuring seamless UX consistency.
- Developed** a modular UI component library with shadcn/ui and Tailwind CSS, accelerating feature delivery by **25%** while enforcing design system compliance.
- Drove performance excellence** through code-splitting, lazy loading, and granular caching strategies—**boosting Core Web Vitals by 35%** and enhancing SEO accessibility.
- Collaborated** cross-functionally with founders and designers in a lean startup environment to ship user-centric solutions for textile/creative entrepreneurs, **reducing iteration cycles by 20%**.

Tactix Solutions – Software Agency Jun 2025 - Jul 2025

Full-Stack Developer

https://tactix.tn

- Delivered a production-ready e-commerce platform** as part of a 4-person Agile team using React (Next.js), NestJS, and MongoDB—**reducing time-to-market by 30%** through iterative sprints and reusable component architecture
- Enhanced user experience and accessibility** by building responsive, pixel-perfect UI components from Figma designs using ShadCN and Tailwind CSS—**achieving WCAG 2.1 AA compliance** and increasing conversion rates by **18%** post-launch.
- Optimized front-end performance** across devices by implementing code splitting, image lazy loading, and caching strategies in Next.js—**improving Core Web Vitals scores by 35%** and reducing initial page load time to under **1.2 seconds**.

NGB Professional Aug 2024 - Oct 2024

Full-Stack Development Trainer

https://www.linkedin.com/company/ngb-professionnelle

- Provided one-on-one full-stack JavaScript mentoring over 12 weeks, guiding a learner through building a functional full-stack app using Node.js/Express (5+ RESTful endpoints), React with Tailwind CSS, and a local MySQL database (Docker container), with basic Prisma ORM integration and Git version control (15+ commits following a feature-branch workflow).
- Guided learners through end-to-end project development—from ideation to deployment—emphasizing clean architecture and industry best practices.
- Focused on real-world applicability, ensuring proficiency in modern toolchains and production-ready development standards.

Self-Employed Jun 2022 – Present

Freelance Full-Stack Developer

- Built and maintained client applications, from MVPs to production systems.
- Tech stack: **React, Next.js, Express, Tailwind CSS, MongoDB/MySQL.**
- Managed full project lifecycle—discovery, development, testing, deployment, and client handoff.

Technical skills

- Frontend: Next.js (App Router), React, TypeScript, Zustand, Tailwind CSS, shadcn/ui, KonvaJS, React Query, Lighthouse Optimization, WCAG 2.1 Compliance,
- Backend: NestJS, RESTful APIs, Prisma ORM, Stripe Integration, Clean Architecture
- DevOps: AWS, Docker, GitHub Actions, CI/CD Pipelines, Nginx
- Methodologies: Agile/Scrum, Test-Driven Development

Education

Higher Institute of Technological Studies of Béja

Bachelor’s in Web & Mobile Development

Languages

English (Fluent)

Arabic (Native)
